

# TRAVERTINE OLIVILLO

*Technical Details*

## TRAVERTINE OLIVILLO

A natural Stone (Travertine) of dark beige color and a striped structure. Formed by precipitation of calcium carbonate. The main mineral is calcite.

Its aesthetics and color tone make this stone an ideal product for interior design and applications in bathrooms, kitchens, countertops, showers, etc.

Its enormous physical-mechanical performance adds to this stone an added value that allows designers to apply this product in any of their designs without fear of maintenance.

Travertine Olivillo has been the product chosen by the most distinguished Architects and Interior Designers in the field of Natural Stone floorings and Luxury Hospitality.

## MECHANICAL PHYSICAL PROPERTIES

PROPERTY	STANDARD	VALUE
Water absorption	UNE EN 13755	1%
Flexural strength	UNE EN 12372	13 Mpa
Impact resistance	UNE EN 1936	30 cm
Abrasion resistance	UNE EN 1926	25 mm
Frost resistance	UNE EN 1936	Resistant
Bulk density	UNE EN 1936	2,4 g/cm <sup>3</sup>
Compressive strength	UNE EN 1926	100 Mpa

Technical information included in this document has been obtained from one or several standardized tests. Values may vary in later tests due to natural stone variation, as it is a product obtained from nature.

## SIZES

Sizes can be adapted to each project requirements. Standard thickness is 2cm and maximum size for this thickness is 240x140cm. For other thickness check available sizes.

*Dimensional tolerance limits according to standards UNE-EN 12058 and UNE-EN 1341.*

Standard surface finishes are:

POLISHED

HONED

DOMUS

SANDBLASTED
