

CREMA MOSCATO

Technical Details

MOSCATO BEIGE

Moscato Beige is a light beige marble. It is calcitic, and it has a homogeneous background. A combination of soft toasted colors compose its base. The veins partially cover the surface and are pearly and brighter compared to the base.

This light beige marble presents the chromatic subtlety and softness of natural suede. Moscato Beige represents the perfect stone for warm spaces that also want to maximize the luminosity of the environment.

Moscato Beige fosters elegant and radiant while welcoming spaces thanks to its light creamy tones. It fits perfectly in interiors, bathrooms, kitchens, countertops, and showers. It is selected by architects and interior designers for large residential projects as well as luxury hotel projects.

MECHANICAL PHYSICAL PROPERTIES

PROPERTIES	STANDARD	VALUE
Water absorption	UNE EN 13755	0,4%
Flexural Strength	UNE EN 12372	8.5Mpa
Bulk Density	UNE EN 1936	2,69 g/cm ³
Compression Resistance	UNE EN 1926	105 Mpa
Frost Strength	UNE EN 1341	Resistant
Open Porosity	UNE EN 1936	1.1%

Technical information included in this document has been obtained from one or several standardized tests. Values may vary in later tests due to natural stone variation, as it is a product obtained from nature.

SIZES

Sizes can be adapted to each project requirements. Standard thickness is 2cm and maximum size for this thickness is 240x140cm. For other thickness check available sizes.

Dimensional tolerance limits according to standards UNE-EN 12058 and UNE-EN 1341.

Standard surface finishes are:

POLISHED

HONED

DOMUS

SANDBLASTED
