

# TAJ MAHAL

*Technical Details*

## TAJ MAHAL

Taj Mahal Sensa is a light beige quartzite. Linear gray veins of varying intensity furrow its base in tenuous cream tones.

This beautiful quartzite receives the name of Taj Mahal for the chromatic similarities it presents with the famous mausoleum of Agra, built entirely in natural stone of a predominant ivory white color.

Its tonal delicacy contrasts with its high level of resistance to stains, which makes it a perfect candidate as a surface for bathroom worktops and, especially, kitchens of great exclusivity.

Its particular combination of off-white and grey converts it into an exceptional stone that architects and interior designers value when dressing interiors and exteriors of luxury projects, both hotel and residential.

TINO Natural Stone offers Taj Mahal Sensa light beige quartzite in the finishes Polished, Honed, Domus and Sandblasted. Check the maximum size per finish. For other finishes, check availability and sizes.

## SIZES

Sizes can be adapted to each project requirements. Standard thickness is 2cm and maximum size for this thickness is 240x140cm. For other thickness check available sizes.

*Dimensional tolerance limits according to standards UNE-EN 12058 and UNE-EN 1341.*

Standard surface finishes are:

**POLISHED**

**HONED**

**DOMUS**

**SANDBLASTED**

## MECHANICAL PHYSICAL PROPERTIES

PROPERTIES	STANDARD	VALUE
Water Absortion	UNE EN 13755	0,14%
Flexural Strenght	UNE EN 12372	15.8 Mpa
Bluk Density	UNE EN 1936	2.7 g/cm3
Compressive strength	UNE EN 1926	156.6 Mpa
Frost Resistance	UNE EN 1341	Resistant

Technical information included in this document has been obtained from one or several standarized tests. Values may vary in later tests due to natural stone variation, as it is a product obtained from nature.
