

BLANCO LASA

Technical Details

BIANCO LASA

Bianco Lasa is a white calcitic marble. It has a white crystalline base and veils markedly linear bluish gray. The soft combination of whites and grays punctually intercalates one or two prominent black and thick streaks.

Each black streak is made up of tourmaline and graphite, and becomes the protagonist of the room thanks to its wide and defined stroke shape.

Bianco Lasa marble is highly valued by architects and interior designers for its ability to dress large interior spaces with elegance. Large residential and luxury hotel projects incorporate Bianco Lasa in prominent walls, separation walls or decorative natural stone murals. It is a marble widely used in book-match compositions.

SIZES

Sizes can be adapted to each project requirements. Standard thickness is 2cm and maximum size for this thickness is 240x140cm. For other thickness check available sizes.

Dimensional tolerance limits according to standards UNE-EN 12058 and UNE-EN 1341..

Standard surface finishes are
